

SORB[®]XT

SORB[®]XT
STRIPPER

Already stripped today?

We tackle stubborn plastic coatings on the collar
- dust-free and fast!

Decoating has never been so easy – the SORB[®] Stripper makes it possible!

**Dust formation during decoating? Now a thing of the past.
Danger for the user? Is now history.**

The SORB[®]XT Stripper is a revolution in stripping technology. Our product is not only extremely effective, but also environmentally friendly, biodegradable and pH-neutral. Sounds impossible? But it's not!

Perfect for deconstruction and renovation.

Whether paint or plastic-containing coatings – our stripper

makes short work of them. Even asbestos is safely encapsulated during removal, so there are no toxic emissions! The SORB®XT stripper is therefore ideal for large renovation and demolition projects.

A tough job? Ask your customers!

Forget dusty and laborious chiseling. With the SORB® Stripper you can work on large areas in record time – up to 500 m² in one day is possible!

Say goodbye to traditional methods and go for efficiency and safety with the SORB®XT Stripper. Discover the new way of stripping and benefit from the many advantages.

Easy to handle.

Simply trowel on or apply using the airless method – the SORB®XT Stripper “cracks” almost all coatings with a plastic chain, with the exception of mineral substrates. Take a look at an application example on our YouTube channel.

Available in 10 kg and 20 kg buckets.

We look forward to your inquiry and are always available for further information.
